

1.

```
PS C:\Users\Job\html> python --version
Python 3.14.7
pip install pandas matplotlib open
pyxl:\Users\Job\html>
```

2.

The screenshot shows a code editor with a dark theme. The top bar displays three tabs: 'index.html', 'hello.py 9+', and 'lab00_check_Otero.py 5'. The 'hello.py' tab is active, showing a Python script with four lines: `1 print("Python is working")`, `2 print(f"Hello {name}")`, `3 python -m pip install --upgrade pip`, and `4`. Below the editor, the 'OUTPUT' panel is visible, showing the execution results. It starts with a filter input, followed by a URL: `https://github.com/PyCQA/pipenv/issues/1000`. The output then shows: `[Done] exited with code=9009 in 0.25 seconds`, `[Running] python -u "c:\Users\Job\html\hello.py"`, `Python is working`, and `[Done] exited with code=0 in 0.377 seconds`.

3.

```
PS C:\Users\Job\html> python -m pip install numpy scipy matplotlib
